ALPHA MOUNT

- 7075-T6 aluminum construction
- Powered/non-powered con iguration
- Force to overcome + Lockout
- Ergonomic adjustments
- Breakaway position for reduced injury risk
- Compatible with standard shrouds
- Lifetime repair or replacement warranty

The “ALPHA” Mount is the pinnacle of night vision helmet mounts. Coming in at 80 grams, it is the lightest and lowest stowing night vision mount available to date for the common “dovetail” shoe interface. This mount is patent pending with a novel design that incorporates a ball detent force to overcome mechanism while also locking at the stowed and deployed positions. This is purposeful and is designed to defeat unwanted wobble in the mount commonly seen in other night vision mounts while also decreasing the chance of accidental deployment. Completely designed, machined, and assembled in the USA, and built to last with high strength 7075-T6 Aluminum, and 17-4 PH Stainless steel. This mount has an optional factory variant that supports a powered shoe for Noctis Technologies devices that are equipped with this option.

SPECIFICATIONS	
Weight	2.83 oz - 0.18 lbs. - 80 g
Fore/Aft Travel	1.65 Inches
Height Adjustment	1.2 Inches
